

# Stanislaus County Regional Science Olympiad

## EVENT SUPERVISOR RESPONSIBILITIES

The Regional Science Olympiad (RSO) event is open to all students in Stanislaus County, in both public and private schools, in grades 6 – 9 (Division B) and in grades 9 – 12 (Division C). Each school may enter up to two teams of up to 15 students on each team. In each division there are 23 competitive tests that are well-balanced among the various sciences disciplines of biology, earth science, chemistry, physics, and technology.

Teams begin using the **2021 Science Olympiad Rule Book** early in the school year to prepare for the one-day competition scheduled as follows:

**Saturday, March 6, 2021 – Modesto Junior College, West Campus Registration: 7–8:30 AM, Competition: 8:30 AM – 3:20 PM Awards Ceremony: Starts Approximately at 4:30 PM**

Each of the 46 events (23 in each division) must have an Event Supervisor with knowledge about the science discipline in which they are volunteering to supervise. In addition, an Event Supervisor might want or need assistants to help on event day. Assistants do not need to have experience.

Review the **schedule** for event times. Most events are scheduled in two time slots (see event day schedule) with half the teams test in each time slot.

### At least two weeks prior to event day do the following:

1. Review rules and Event Logistics Chart for your event in detail. If an error occurs on event day DO NOT make a change once the event has begun. Event must be the same for all students.
2. Write the test using the rules for the event. Additional resources are available on the National Science Olympiad website at: [www.soinc.org](http://www.soinc.org) click "B/C Events" then "B or C" for each division.
3. Secure all needed supplies for the event. In most cases expenses for supplies can be reimbursed by the Stanislaus County Office of Education Event Coordinator.

### On event day do the following:

1. Register for your event at the volunteer registration table (Conference Rm 115).
2. Along with Event Assistants set up for your event well in advance of start time at the location indicated on the event schedule.
3. Administer the test to all participants. Be consistent with all participating teams.
4. After time is up collect and score all tests. Make very effort to score the tests as quickly as possible **(Note: The Awards Ceremony begins at 4:30 PM)**.
5. If your event requires impound (see event schedule) and a team is late to impound see the rules for instructions to penalize the team, or rank the team behind all other teams. Only PARTICIPANTS can impound. Adults not allowed at impound or at a "closed" event.
6. Immediately notify a team if they are placed in a tier other than the first tier and provide the reason.
7. I will not release times, distances, or scores to anyone except Science Olympiad officials.
8. Return classroom back to the way in which it was found and deliver the scored tests to the scoring room (Conference Rm 115). Tests will not be returned to students.
9. Follow a "Never Alone" policy when working with students. Science Olympiad is by definition a team activity, with most contact between adults and students in very large group settings. It is in the best interest of volunteers to not be alone with a student. A breakfast snack and lunch are provided for all volunteers.

If you have questions please feel free to contact the Volunteer Coordinator, Leisa Turner, at 238-1715 or [lturner@stancoe.org](mailto:lturner@stancoe.org). Information is also available on the following website: [www.scoestudentevents.org](http://www.scoestudentevents.org)
